Bronze Butterflies

Bronze monarch butterflies are a unique and creative alternative for people choosing to honor, remember or celebrate their loved ones in a garden setting. Butterfly memorials are bent at each wing, or can be made flat.

The bronze monarch butterfly is 5-3/4"x4-1/4". Two lugs are located on the back for mounting. They can be attached to a stake to go in the ground or mounted to the surface of a rock.

Garden Cremation Markers

Available in
Jet Black & Light Grey

Garden Cremation Markers are a unique and creative alternative for people choosing cremation for their loved ones without a cemetery plot. The Garden Cremation Marker allows for placement of the actual cremains in a stainless steel container that is attached to the underside of a Jet Black granite or Light Gray granite marker. The size of this memorial makes it easy to place in your favorite location. In the event you move, the marker can easily be removed and taken with you.

Garden Cremation Markers can be personalized in beautiful, creative and unique ways. You can combine your favorite photo, select from meaningful themes, and personalized writing.

The Garden Cremation Marker includes a Jet Black or Light Gray granite polished top, sawn edge marker that measures 1'0" x 1'0" x 0'2". A stainless steel container is provided for the cremains. The container is then stored inside a polymer plastic container which is water resistant and attached to the underside of the marker.
